

## Grayling Highlights Radio Communications Division

### **ClearCalm and Stone Mountain Aggressively Expanding Distribution Channels In One Billion Dollar Industry**

CALGARY, AB - (September 26, 2007) Grayling Wireless USA, Inc. (GRYW: PK) is pleased to provide an update highlighting its Radio Communications Division.

ClearCalm, our signature product, has undergone many months of thorough field evaluations at numerous locations under "live" conditions. The feedback has surpassed our greatest expectations in our goal to be the "Premier Wireless Communications Device" for SCBA users in the confined space, Hazmat and Fire Department arena. We are having an overwhelming product acceptance by agencies that are testing the product with a market potential of more than one billion dollars.

In addition, we are well down the path of transitioning the ClearCalm operations to our Stone Mountain facility in Virginia. Stone Mountain manufactures communication devices used by police departments and emergency units throughout the country. We are now adding ClearCalm to the Stone Mountain suite of products and will add distribution through the existing network of dealers throughout North America. This combination will provide significant cost savings and significantly increased revenues and earnings.

Grayling CEO Jeff Love said, "These new operational and sales initiatives are expected to deliver an excellent growth profile and profitability for Grayling in Fiscal 2008."
